DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN CLAIM 77:

Please delete "77" in line 1 and replace with --76--.

Response to Arguments

2. Applicant's arguments, filed 9 May 2006, with respect to claims 39, 40, and 43 have been fully considered and are persuasive. The 35 USC 112 rejection of claims 39, 40, and 43 has been withdrawn.

Allowable Subject Matter

3. Claims 35-61 and 69-77 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest the device claimed by applicant. In particular, the prior art fails to disclose or suggest a fluid separation control system with the claimed components and a processor wherein the processor is programmed to generate first-level alarm triggering signals, pausing flow in the system, as well as count the number

of first-level alarm triggering signals to generate a second-level alarm triggering signal, slowing down fluid flow in the system, along with the other steps and limitations of the claims. Applicant's recitation that the processor is "programmed to" perform the claimed functions requires that the prior art disclose or suggest a device that is programmed or otherwise configured to perform the claimed function.

The best prior art of record, US 5,423,746 to Burkett and US 5,954,971 to Pages both disclose fluid flow controllers with the claimed components, but fail to disclose the particular functions of applicant's claimed processor. None of the prior art devices disclose or suggest the specifically claimed interrelationship between the first level alarms, second level alarms, and state of fluid flow during the alarm periods, as claimed by applicant. Therefore, the instant invention is patentable over the prior art.

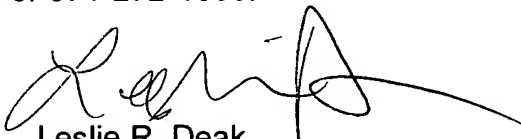

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
